Please don't just take for granted that all containerised storage facilities are the same, they are not...

The Advanced Storage Centre has been purpose built and is the most modern in the area. In fact our facility is one of the best in the South-West and Mid-West of England and all our customers are welcome to visit our Storage Centre to inspect prior to placing their order with us. We offer a 24-hour Surveillance System and Fully Alarmed Centre with access direct to the police. We are confident that once you have inspected our Centre you will agree you will not find better.

We offer a flexible approach, containers are suited to a wide range of product storage, and this makes it extremely competitive when compared to other types of storage.

Quite rightly our Customers demand CLEAN, DRY, SECURE and ACCESSIBLE storage and we satisfy those demands.

Each container internal dimensions are Height 7'2" Depth 7' Width 5'2" they are industry standard containers the equivalent of say a box room.

Guidelines for Packing your container

- Distribute the weight evenly in your container, not all on one side.
- Boxes should be filled completely and lids closed.
- Protect your items with supplied moving blankets or use paper or bubble pack.
- Place heavy items on the bottom, lightweight items on the top.
- Heavy items should be packed in small boxes for easier lifting. Lightweight items can go in larger boxes.
- Pack all your items as tight as possible using blankets provided. Avoid leaving open space where items can shift.

Tables and Chairs: Disassemble if possible, wrapping legs with paper pads to avoid scratching. Place any hardware in a plastic bag and tape to the underside of the table. Wrap the table top and place against the side of the container, not on the bottom.

Upholstered items: Couches can be packed on their feet, with a second couch inverted on top of the other for protection. A single couch can be placed on end, using blankets provided to protect the arm rests. Paper suite covers are available for purchase.

Mattresses: Place mattresses in a protective bag, and place along the side of the container. Mattress covers are available to purchase.

Rugs: After vacuuming rugs, roll up, tie with a rope. Do not fold.

Lamps: Place small bases in dresser drawers with paper or cloth padding, and large ones in boxes with wadded-up paper in the extra space. Shades should be placed in individual boxes with wadded-up paper in the empty spaces.

Beds: Tie bed rails together and use mattress covers for mattresses.

Bicycles and Tools: Clean and cover with a paper pad or moving blankets to protect your other goods from being torn. Small tools can be placed in a box together. Long handled tools should be taped together and placed in bin bag.

Clothing: Boxes are best for storing clothing. You can place shoes in bags and folded items in the bottom. Small garment items can be left in dresser drawers.

Mirrors and Pictures: Wrap mirrors and pictures in paper and bubble wrap and pack in a box. Do not lay mirror boxes flat. If possible, place between mattresses, or place on the side of your container.

Appliances: Clean thoroughly before storing. Drain all water and leave doors slightly ajar to prevent mildew. Tape down all moving parts.

Books and Papers: Pack in small boxes for easy lifting.

What will fit into a Container: To assist you with your estimation, we have listed below an example of the approximate quantity of furniture you can place in one container. For example:

- Fridge
- Cooker
- Washing Machine
- Bureau
- Double Bed and Mattress
- Single Bed and mattress
- 10 -15 Cartons (tea chest size)
- Single Bed and mattress
- Double Wardrobe
- Single Wardrobe (you can use the space inside a wardrobe if not dismantled)

By the way, 'self-storage' is perceived to be cheaper than that which is offered by a professional Removal and Storage Company, this may not be the case – Call us for more information and a no obligation quote.
