

PACKING

Our strong advice is that you arrange for us to pack professionally for you, it may cost a lot less than you thought and saves you money by cutting down the risk of damage. However, if you decide to self pack, start as early as is practical. Have an area set aside where items that you are going to personally transport to your new home are kept, along with the cartons, bags and cases into which they will be put.

You must use strong cartons and proper packing materials. Ask us to supply you with the professional packing materials we would use if we were packing for you.

CHINA AND GLASS

Line the carton with shredded newspaper and wrap pieces individually in tissue paper. Mark the box 'Fragile' or 'Very Fragile'.

BOOKS

For weight reasons, the rule of thumb is no more than 30 to a carton.

PLATES, RECORDS AND CDs

Stand on side, do not pack flat.

TOYS

Ask the children which toys they would like left out - do not pack them.

MOVING TIPS

Organising it all...

Taking stock

Take a long hard look at what you really want to keep and what you've kept for years past its usefulness. There is of course an added advantage of getting rid of items that have passed their sell-by date. You may be able to sell them and taking less may reduce the removal charge.

Floor Plan

Draw a floor plan of your new home and name each room so that it can be identified by the removal crew, that way items will be delivered to the right location.

Labelling

Clearly label particularly large items and mark on the floor plan the position you would like them in the room.

Cartons

- Don't use cartons that are very large.
- Don't overload cartons.
- Mark on cartons what they contain.
- Mark cartons with the room in which they are to be left.
- Mark cartons with information such as 'Fragile', 'This way up' etc.

Before just tossing your belongings into boxes a master plan is called for. Follow the 'Things To Do & Arrange' checklist overpage.
